The Successful Principal - Dr. Robert Cunard 2017-07-21

The Successful Principal takes its reader through the arc of the principalship, beginning with teaching, moving on to promotion to the administrative office and how to achieve it, describing how to go about entry planning, going into depth about the challenges and opportunities the principal faces in leading a school, and moving into a focus on how to thrive as a principal while growing the skills of others. This is a book

designed to give principals advice on how to do the job well. The book is buttressed by research where appropriate, and it pays particular attention to the principal's basic conundrum, which is this: while he/she is arguably the face and leader of the school, he/she is often the person with the least actual power in the system. The book takes a realistic look at the principal's power, opportunities, and structural and political limitations and then teaches its readers how successful principals find a way forward in spite of those challenges.

The Philosophy of Psychology - George Botterill 1999-08-19

What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as

a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

Examining the Assistant Principals - Alan R. Shoho 2011-11-01
This edited book highlights the importance and complexity of the assistant principalship. As noted in all the chapters, the assistant principal is a critical partner in creating a professional learning community that serves all students well. Often neglected or ignored in the literature, assistant principals are more than disciplinarians and student or building managers. In the best of all worlds, they provide the professional support and partnership with their principals to create high-performing schools. Unfortunately, as noted in some of the chapters, the ideal and actual roles that assistant principals exercise often create a gap that seethes with disillusionment and dissatisfaction. The challenge for the profession is to better align the roles and expectations of assistant principals so that they can experience the best of being a school leader.

Now We're Talking! - Justin Baeder 2017

"Most leaders and teachers don't fully realize the potential that daily classroom visits have to prompt significant improvements in teaching and learning. In *Now We're Talking!: 21 Days to High-Performance Instructional Leadership*, Justin Baeder presents a high-performance instructional leadership approach that far surpasses traditional walkthrough models of feedback. He asserts the classroom is the best environment for professional learning, and he gives readers strategies to help them develop the instructional leadership habit of visiting classrooms daily, based on his global online experiment called the 21-

Day Instructional Leadership Challenge, which has attracted more than ten thousand participants in more than fifty countries. When instructional leaders observe three classrooms a day for five to ten minutes each, and then have a brief evidence-based conversation with the teacher thereafter, they can learn more about their teachers' thinking and practices. With this firsthand shared information, they can make informed operational and instructional decisions that foster rich relationships with teachers, improve professional practices, reduce stress, and increase student learning"

17,000 Classroom Visits Can't Be Wrong - John V. Antonetti 2015-02-20

"Most educators are skilled at planning instruction and determining what they will do during the course of a lesson. However, to truly engage students in worthwhile, rigorous cognition, a profound shift is necessary: a shift in emphasis from teaching to learning. Put another way, we know that whoever is doing the work is also doing the learning—and in most classrooms, teachers are working much too hard. Authors John V. Antonetti and James R. Garver are the designers of the Look 2 Learning model of classroom walkthroughs. They've visited more than 17,000 classrooms—examining a variety of teaching and learning conditions, talking to students, examining their work, and determining their levels of thinking and engagement. From this vast set of data, they've drawn salient lessons that provide valuable insight into how to smooth the transition from simply planning instruction to designing high-quality student work. The lessons John and Jim have learned from their 17,000 (and counting) classroom visits can't be wrong. They share those lessons in this book, along with stories of successful practice and practical tools ready for immediate classroom application. The authors also provide opportunities for reflection and closure designed to help you consider (or reconsider) your current beliefs and practices. Throughout, you will hear the voices of John and Jim—and the thousands of students they met—as they provide a map for shifting the classroom dynamic from teaching to learning."
