Numerology and Astrology for Beginners - Crystal Hathaway 2019-10-16

If You Want to Calculate Your Life Path And Know What Numbers Know That You Don't, Then Keep Reading... Do you sometimes question if you are on the right path or if you are wasting your time on something you are not supposed to do? Do you repeatedly see numbers all around you? I'm not talking about telephone numbers, area codes or price tags, but patterns that are not 'normal'? 11:11, 333, 666? Do you ever recognize certain character traits among people that are born in the same month? What if all the 'coincidences' in your life mean much more than you think on first sight? There is a 4000-year-old science based on the mathematics of the universe called numerology. Instead of 1+1, you can reveal the message behind everything that is happening in your life right now. And even more. Once you discover how to decode numbers and understand how astronomical phenomena impact a person's personality, you can not only predict, but also change your future for the better. Imagine you had the ability to decide your child's destiny? The day and month someone is born shapes who they are today and who they are going to become. There is no such thing as coincidence. People fear numbers and astrology because it's easier to blindly follow their fellows. Most of us live in a fake bubble of who we are and what we are doing on this planet. Looking deeper into numbers and the position of celestial objects requires strength and willpower. From now on, you can take charge of your destiny. Always remember, the universe has your back and you will receive the same energy back that you send out. In Numerology and Astrology for Beginners, you'll discover: How the flap of a butterfly's wings in Mexico cause a giant change in your life The man's name that 666 stands for and if you should be worried (Find the answer on page 12) Why you are missing out on an exciting adventure if you are not paying

attention to this one number in your life (hint: between 0-10) Why 911 is the universal help hotline if you want a change in life Which numbers can help to heal physical and mental diseases How to become pregnant at the right time to ensure your child has a healthy and prosperous future The 12 zodiac signs, their meanings, and assets to achieve your goals Cheat sheet for a stronger and more passionate relationship Why some people feel like they are born in the wrong family and why they are right How to choose your friends and partners wisely and prevent yourself from energy draining relationships How and which numbers predicted the success of Apple, BMW, Microsoft and Co. (page 41) And much more. If this is your first contact with astrology and numerology, you might be skeptical if this unknown science is trustworthy. We have all heard the sentence 'Only an idiot would believe that the month you are born could have effect on your personality.' But what if I tell you that science has proven: you are more likely to be diagnosed with schizophrenia if you are born in February suicide is strongest in people born in between April and June you could be suffering from dyslexia if you are a summer baby If you still think it's all hocus-pocus, then you must be a Gemini (they tend to be over skeptical).

Zodiac Signs and Astrology - Astrid Kundali 2020-10-27

Are you looking for a complete guide on astrology? Then keep reading... Astrology has been used for centuries to give people a clearer sense of who they are and what they need out of life, but much of the available information in the past amounted to general descriptions of personalities, as if they were set in stone with no room for change. Predictive astrology was used to look at the future, but because there are so many variables, predictions were often wrong. That's not to suggest that there are not some excellent "mundane astrologers"-that is, astrologers who predict worldly events, such as times of challenge in economics and politics. That, however, is not what most people are interested in when they turn to astrology to learn something deeper about themselves For millennia, humans have gazed up to the stars and recognized the connection between the cosmic cycles and movement of the heavens as having an effect on earth. For example, the seasons and tides are clearly affected by cosmic cycles. At some point, they came to understand that cosmic cycles also have an effect on us. In fact, astrology, in one form or another, has been around for thousands of years as a divinatory tool used to predict global and personal events. There is some evidence that the ancient Sumerians used the cosmos as a guide. The Babylonians are generally credited with creating the first organized system of astrology, but there is no specific evidence of the organization they used. The cosmos is based on cycles and circles. The movement of all atomic structures on earth is mirrored in the movements of the planets in our galaxy and in the movement of the galaxy within the universe, moving as spirals within spirals, and so it is within us. Aligning with the planetary phases and rhythms brings flow to our lives as we evolve with the cosmic energies rather than fight against them. With this knowledge, you are able to face challenging energies with a more philosophical approach as you begin to embody the flow and cyclical nature of life, the earth, and the universe, knowing that all is evolving as you are. This book covers
