Aztlán Arizona - Darius V. Echeverría

2014-03-27

Aztlán Arizona is a history of the Chicano Movement in Arizona in the 1960s and 1970s. Focusing on community and student activism in Phoenix and Tucson, Darius V. Echeverría ties

the Arizona events to the larger Chicano and civil rights movements against the backdrop of broad societal shifts that occurred throughout the country. Arizona's unique role in the movement came from its (public) schools, which were the primary source of Chicano activism

against the inequities in the judicial, social, economic, medical, political, and educational arenas. The word Aztlán, originally meaning the legendary ancestral home of the Nahua peoples of Mesoamerica, was adopted as a symbol of independence by Chicano/a activists during the movement of the 1960s and 1970s. In an era when poverty, prejudice, and considerable oppositional forces blighted the lives of roughly one-fifth of Arizonans, the author argues that understanding those societal realities is essential to defining the rise and power of the Chicano Movement. The book illustrates how Mexican American communities fostered a togetherness that ultimately modified larger Arizona society by revamping the educational history of the region. The concluding chapter outlines key Mexican American individuals and organizations that became politically active in order to address Chicano educational concerns. This Chicano unity, reflected in student, parent, and community leadership organizations, helped

break barriers, dispel the Mexican American inferiority concept, and create educational change that benefited all Arizonans. No other scholar has examined the emergence of Chicano Movement politics and its related school reform efforts in Arizona. Echeverría's thorough research, rich in scope and interpretation, is coupled with detailed and exact endnotes. The book helps readers understand the issues surrounding the Chicano Movement educational reform and ethnic identity. Equally important, the author shows how residual effects of these dynamics are still pertinent today in places such as Tucson.

Stress and Coping in Families - Katheryn

During difficult times, families can be our greatest resource, or our heaviest burden. This book brings together research from a wide

variety of disciplines to examine family interaction in the context of stressful situations. Instead of claiming that one type of interaction is better than other, seemingly unproductive forms of communication, the approach taken by the author recognizes that messages can have varying, sometimes unexpected consequences when a family is distressed. In addition to introducing students, scholars, and practitioners to the stress and coping literatures from both the individual and family perspectives, the book offers an in-depth examination of how relational communication scholars have contributed to this important and rich body of research. The book also explores family stress and coping within three specific contexts (military family separation, breast cancer, the transition to parenthood) and provides readers with the opportunity to apply their knowledge through case studies and examples from families who have lived through these difficult situations.

Families and Their Social Worlds - Karen Secombe 2008

This text applies a sociological imagination to explore both the private, personal side of family life as well the public, institutional nature of "the Family." It shows that many family concerns are actually social issues that need to be addressed through sound social policies. The author, Karen Secombe, encourages students to think about families beyond their own personal experiences, and even beyond family structure in the United

States. Her goal is to impart a passion for critical thinking as students see that families exist within social worlds. *Families and Their Social Worlds* shows that our conceptions of families are imbedded within our social structure, and that families represent a set of rules, regulations and norms that are situated in a particular culture in a particular historical time. Important policy considerations are imbedded in each chapter to illustrate what is currently being done, and perhaps even more importantly, what can be done to strengthen families and intimate relationships.

Equitable Sharing - Thomas Kleven 2013-12-16
In *Equitable Sharing: Distributing the Benefits and Detriments of Democratic Society*, Thomas Kleven argues that a principle of equitable sharing is fundamental to the concept of democracy and is implicit in the Declaration of Independence and the Constitution. Kleven

makes the case that the Supreme Court, interacting with the public and the legislature, has a meaningful role to play in the dialogue over the requirements of equitable sharing and can play this role in a manner consistent with democratic principles.

Ethnic Families in America - Charles H. Mindel 1981

These differences are embedded in what are generally known as "ethnic groups."

Ethnicity is usually displayed in the values, attitudes, lifestyles, customs, rituals, and personality types of individuals who identify with particular ethnic groups."--Introduction.

Treats Family Diversity as the Norm Diversity in Families, 10/e by Maxine Baca Zinn, D. Stanley Eitzen, and Barbara Wells is organized around the structural-diversity framework. This framework views family diversity as the norm and follows that all families in society are shaped through their interaction with social structures. Families are viewed not as the “building blocks of societies” but rather, as products of social forces within society. The authors demystify and demythologize the family by exposing myths, stereotypes, and dogmas, allowing students to emerge with an understanding of why families are diverse.

Investigating Gender Martha E. Thompson
2012-01-10

Gender analysis remains central to understanding social life, yet focusing on gender alone is inadequate. Recent feminist sociological scholarship highlights how gender intersects with other systems of privilege and oppression. In this book five themes are carried forward throughout the text: the social construction of gender differences; gendered inequalities; intersections of gender with other systems of privilege and oppression; a relational global perspective; and the necessity of working toward social justice.

The State of Families - Jennifer A. Reich
2020-12-29

The State of Families: Law, Policy, and the Meanings of Relationships collects essential readings on the family to examine the multiple forms of contemporary families, the many issues facing families, the policies that regulate families, and how families—and family life—have become politicized. This text explores various dimensions of “the family” and uses a critical

approach to understand the historical, cultural, and political constructions of the family. Each section takes different aspects of the family to highlight the intersection of individual experience, structures of inequality—including race, class, gender, sexuality, disability, and immigration—and state power. Readings, both original and reprinted from a wide range of experts in the field, show the multiple forms and meanings of family by delving into topics including the traditional ground of motherhood, childhood, and marriage, while also exploring cutting edge research into fatherhood, reproduction, child-free families, and welfare. Taking an interdisciplinary approach to the family, *The State of Families* offers students in the social sciences and professionals working with families new ways to identify how social structure and institutional practice shape individual experience.

Education, Race, and Family - Karen Lambourne 1993

The Dating Divide - Celeste Vaughan Curington 2021-02-09

The data behind a distinct form of racism in online dating The Dating Divide is the first

comprehensive look at "digital-sexual racism," a distinct form of racism that is mediated and amplified through the impersonal and anonymous context of online dating. Drawing on large-scale behavioral data from a mainstream dating website, extensive archival research, and more than seventy-five in-depth interviews with daters of diverse racial backgrounds and sexual identities, Curington, Lundquist, and Lin illustrate how the seemingly open space of the internet interacts with the loss of social inhibition in cyberspace contexts, fostering openly expressed forms of sexual racism that are rarely exposed in face-to-face encounters. The Dating Divide is a fascinating look at how a contemporary conflux of individualization, consumerism, and the proliferation of digital technologies has given rise to a unique form of gendered racism in the era of swiping right—or left. The internet is often heralded as an equalizer, a seemingly level playing field, but the digital world also acts as an extension of and

platform for the insidious prejudices and divisive impulses that affect social politics in the "real" world. Shedding light on how every click, swipe, or message can be linked to the history of racism and courtship in the United States, this compelling study uses data to show the racial biases at play in digital dating spaces.

Women of Color in U.S. Society - Maxine Baca Zinn 1994

The theme of race, class, and gender as interlocking systems of oppression unites these original essays about the experience of women of color—African Americans, Latinas, Native Americans, and Asian Americans. The contributing scholars discuss the social conditions that simultaneously oppress women of color and provide sites for opposition. Though diverse in their focus, the essays uncover similar experiences in the classroom, workplace, family, prison, and other settings. Working-class women, poor women, and professional women alike experience subordination, restricted

participation in social institutions, and structural placement in roles with limited opportunities. How do women survive, resist, and cope with these oppressive structures? Many articles tell how women of color draw upon resources from their culture, family, kin, and community. Others document defenses against cultural assaults by the dominant society. Native American mothers instilling tribal heritage in their children; African American women engaging in community work; and Asian American women opposing the patriarchy of their own communities and the stereotypes imposed by society at large. These essays challenge some of our basic assumptions about society, revealing that experiences of inequality are not only diverse but relational."

Brief History of Social Problems Frank J. McVeigh 2004

In this book, Frank McVeigh and Loreen Wolfer take an historical approach to examine the causes and conflicts behind ten major social

problems that have existed for nearly 230 years. Using a critical thinking perspective of the history, sociology, politics, and economics of the period, the authors analyze social problems as a series of conflicts between those with power and those who were at one time virtually powerless. Embedded in this analysis is a discussion of how the shift from a *Gemeinschaft* to *Gesellschaft* society has influenced how we address these problems. Using these themes, McVeigh and Wolfer provide thought-provoking insight into the ways individuals, groups, and social institutions change over time, gaining or losing power. The book contains a preface by Arthur Shostak, Drexel University.

Live and Die Like a Man - Farha Ghannam
2013-09-04

Watching the revolution of January 2011, the world saw Egyptians, men and women, come together to fight for freedom and social justice. These events gave renewed urgency to the fraught topic of gender in the Middle East. The

role of women in public life, the meaning of manhood, and the future of gender inequalities are hotly debated by religious figures, government officials, activists, scholars, and ordinary citizens throughout Egypt. *Live and Die Like a Man* presents a unique twist on traditional understandings of gender and gender roles, shifting the attention to men and exploring how they are collectively "produced" as gendered subjects. It traces how masculinity is continuously maintained and reaffirmed by both men and women under changing socio-economic and political conditions. Over a period of nearly twenty years, Farha Ghannam lived and conducted research in al-Zawiya, a low-income neighborhood not far from Tahrir Square in northern Cairo. Detailing her daily encounters and ongoing interviews, she develops life stories that reveal the everyday practices and struggles of the neighborhood over the years. We meet Hiba and her husband as they celebrate the birth of their first son and begin to teach him

how to become a man; Samer, a forty-year-old man trying to find a suitable wife; Abu Hosni, who struggled with different illnesses; and other local men and women who share their reactions to the uprising and the changing situation in Egypt. Against this backdrop of individual experiences, Ghannam develops the concept of masculine trajectories to account for the various paths men can take to embody social norms. In showing how men work to realize a "male ideal," she counters the prevalent dehumanizing stereotypes of Middle Eastern men all too frequently reproduced in media reports, and opens new spaces for rethinking patriarchal structures and their constraining effects on both men and women.

Intersectional it- Ange-Marie Hancock 2016
"Though intersectionality theory has emerged as a highly influential school of thought in ethnic studies, gender studies, law, political science, sociology and psychology, no scholarship to date exists on the evolution of the theory. This book

seeks to remedy the gap by attending to the historical, geographical, and cross-disciplinary myopia afflicting current intersectionality scholarship. This comprehensive intellectual history will be an agenda-setting work for the theory"--

For Love or Money - Nancy Folbre 2012-09-06

As women moved into the formal labor force in large numbers over the last forty years, care work - traditionally provided primarily by women - has increasingly shifted from the family arena to the market. Child care, elder care, care for the disabled, and home care now account for a growing segment of low-wage work in the United States, and demand for such work will only increase as the baby boom generation ages. But the expanding market provision of care has created new economic anxieties and raised pointed questions: Why do women continue to do most care work, both paid and unpaid? Why does care work remain low paid when the quality of care is so highly valued? How effective

and equitable are public policies toward dependents in the United States? In *For Love and Money*, an interdisciplinary team of experts explores the theoretical dilemmas of care provision and provides an unprecedented empirical overview of the looming problems for the care sector in the United States. Drawing on diverse disciplines and areas of expertise, *For Love and Money* develops an innovative framework to analyze existing care policies and suggest potential directions for care policy and future research. Contributors Paula England, Nancy Folbre, and Carrie Leana explore the range of motivations for caregiving, such as familial responsibility or limited job prospects, and why both love and money can be efficient motivators. They also examine why women tend to specialize in the provision of care, citing factors like job discrimination, social pressure, or the personal motivation to provide care reported by many women. Suzanne Bianchi, Nancy Folbre, and Douglas Wolf estimate how

much unpaid care is being provided in the United States and show that low-income families rely more on unpaid family members for their child and for elder care than do affluent families. With low wages and little savings, these families often find it difficult to provide care and earn enough money to stay afloat. Candace Howes, Carrie Leana and Kristin Smith investigate the dynamics within the paid care sector and find problematic wages and working conditions, including high turnover, inadequate training and a “pay penalty” for workers who enter care jobs. These conditions have consequences: poor job quality in child care and adult care also leads to poor care quality. In their chapters, Janet Gornick, Candace Howes and Laura Braslow provide a systematic inventory of public policies that directly shape the provision of care for children or for adults who need personal assistance, such as family leave, child care tax credits and Medicaid-funded long-term care. They conclude that income and variations in

states’ policies are the greatest factors determining how well, and for whom, the current system works. Despite the demand for care work, very little public policy attention has been devoted to it. Only three states, for example, have enacted paid family leave programs. Paid or unpaid, care costs those who provide it. At the heart of *For Love and Money* is the understanding that the quality of care work in the United States matters not only for those who receive care but also for society at large, which benefits from the nurturance and maintenance of human capabilities. As care work gravitates from the family to the formal economy, this volume clarifies the pressing need for America to fundamentally rethink its care policies and increase public investment in this increasingly crucial sector.

Latinos in American Society - Ruth Enid Zambrana 2011-06-15

It is well known that Latinos in the United States bear a disproportionate burden of low educational attainment, high residential segregation, and low visibility in the national political landscape. In *Latinos in American Society*, Ruth Enid Zambrana brings together the latest research on Latinos in the United States to demonstrate how national origin, age, gender, socioeconomic status, and education affect the well-being of families and individuals. By mapping out how these factors result in economic, social, and political disadvantage, Zambrana challenges the widespread negative perceptions of Latinos in America and the single story of Latinos in the United States as a monolithic group. Synthesizing an increasingly

substantial body of social science research—much of it emerging from the interdisciplinary fields of Chicano studies, U.S. Latino studies, critical race studies, and family studies—the author adopts an intersectional "social inequality lens" as a means for understanding the broader sociopolitical dynamics of the Latino family, considering ethnic subgroup diversity, community context, institutional practices, and their intersections with family processes and well-being. Zambrana, a leading expert on Latino populations in America, demonstrates the value of this approach for capturing the contemporary complexity of and transitions within diverse U.S. Latino families and communities. This book offers the most up-to-date portrait we have of Latinos in America today.
