Reading Like a Historian - Avishag Reisman 2011

Enthusiasm about the instructional potential of primary sources dates to the late 19th century and has been echoed recently in the work of literacy experts, historians, and educational psychologists. Yet, no extended intervention study has been undertaken to test the effectiveness of primary source instruction in real history classrooms. This study, with 236 eleventh-grade students in five San Francisco high schools, represented the first large-scale extended curriculum intervention in disciplinary reading in an urban district. The Reading Like a Historian (RLH) curriculum constituted a radical departure from traditional textbook-driven instruction by using a new activity structure, the "Document-Based Lesson," in which students used background knowledge and disciplinary reading strategies to interrogate, and then reconcile, historical accounts from multiple texts. A quasi-experiment control design measured the effects of a six-month intervention on four dimensions: 1) students' historical thinking; 2) their ability to transfer historical thinking strategies to contemporary issues; 3) their mastery of factual knowledge; and 4) their growth in general reading comprehension. MANCOVA analysis yielded significant main effects for the treatment condition on all four outcome-measures. Qualitative analyses of videotaped classroom lessons were conducted to determine the frequency and nature of whole-class text-based discussion. Only nine whole-class text-based discussions were identified in over 100 videotaped classroom lessons, despite the presence of instructional materials explicitly designed to support student discussion of debatable historical questions. Analysis of teacher and student participation suggests a relationship between active teacher facilitation that reviews background knowledge and poses direct questions about texts and higher levels of student argumentation. This dissertation is structured as three free-standing papers, each of which addresses one aspect of the larger study. In the first paper, I discuss the design of the quasi-experimental study and report quantitative findings. In the second paper, I locate teacher facilitation of whole-class historical discussion in the literature on classroom discourse, and I propose a developmental framework for analyzing student historical argumentation in classroom discussion. In the third and final paper, I discuss the theoretical underpinnings of the intervention curriculum and offer two examples to illustrate the structure of the "Document-Based Lesson."

Handbook of Epistemic Cognition - Jeffrey A. Greene 2016-01-22

The Handbook of Epistemic Cognition brings together leading work from across disciplines, to provide a comprehensive overview of an increasingly important topic: how people acquire, understand, justify, change, and use knowledge in formal and informal contexts. Research into inquiry, understanding, and discovery within academic disciplines has progressed from general models of conceptual change to a focus upon the learning trajectories that lead to expert-like conceptualizations, skills, and performance. Outside of academic domains, issues of who and what to believe, and how to integrate multiple sources of information into coherent and useful knowledge, have arisen as primary challenges of the 21st century. In six sections, scholars write within and across fields to focus and advance the role of epistemic cognition in education. With special attention to how researchers across disciplines can communicate and collaborate more effectively, this book will be an invaluable resource for anyone interested in the future of knowledge and knowing. Dr. Jeffrey A. Greene is an associate professor of Learning Sciences and Psychological Studies in the School of Education at the University of North Carolina at Chapel Hill. Dr. William A. Sandoval is a professor in the division of Urban Schooling at the UCLA Graduate School of Education & Information Studies. Dr. Ivar Bråten is a professor of Educational Psychology at the Faculty of Educational Sciences at the University of Oslo, Norway.

Teaching World History Thematically - Rosalie Metro 2020

This book offers the tools teachers need to get started with a more thoughtful and compelling approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets social studies 3C standards and most state standards (grades 6-12). The author provides over 90 primary sources organized into seven thematic units, each structured around an essential question from world history. As students analyze carefully excerpted documents--including speeches by queens and rebels, ancient artifacts, and social media posts--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century citizen of the world. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents themselves, this teaching manual provides strategies to assess student learning; mini-lectures designed to introduce documents; activities and reproducibles to help students process, display, and integrate their learning; guidance to help teachers create their own units; guidelines for respectful student debate and discussion; and more. Book Features: A timely aid for secondary school teachers tasked with meeting standards and other state-level quality requirements. An approach that promotes student engagement and critical thinking to replace or augment a traditional textbook. Challenges to the "master narrative" of world history from figures like Queen Nzinga and Huda Sha'arawi, as well as traditionally recognized historical figures such as Pericles and Napoleon. Essential questions to help students explore

seven of the most important recurring themes in world history. Role-plays and debates to promote interaction among students. Printable copies of the documents included in the book can be downloaded at tccpress.com.

Vital Witnesses - Mark Newman 2014-09-29

The use of primary sources as texts in the classroom is growing. Teachers realize these vital witnesses provide opportunities to motivate students and improve learning. They bring students closer to the people, places, and events being studied and help students improve content knowledge while building skills. Recent trends in standards, such as Common Core, and the increasing use of the Document-Based Questions also promote primary source use. The strong push to use primary sources in teaching history and social studies creates a need among teachers for more information on what they are and how they can be used effectively in the classroom. Vital Witnesses meets this need by providing teachers with a comprehensive guide to primary sources and their use in the classroom. Primary sources are defined, and the various types are

described. Classroom-tested activities and strategies are offered to teachers for addressing the needs of all learners and for accommodating Common Core standards and the C3 Framework for State Social Studies Standards.

Qualitative Data Analysis with ATLAS.ti - Susanne Friese 2019-03-22

Now updated to cover latest versions and featuring instructions for both Mac and Windows users, this book is still the go-to source of support for getting to grips with qualitative data analysis using ATLAS.ti. With over twenty years of experience using, developing, and teaching ATLAS.ti, Susanne Friese is the perfect data analysis tour guide. Aware of common challenges and sticking points, she eases readers from readying and organizing data into coding and querying it, providing not only tips on how to prepare for analysis, but also the tools and technical know-how needed to observe, examine, and discuss data. Placing quick software 'skills training' tutorials alongside different stages of the data analysis process, she gives readers the opportunity to integrate software training with their actual analysis.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
