*After Empires* - Giuliano Garavini 2012-10-25

After Empires describes how the end of colonial empires and the changes in international politics and economies after decolonization affected the European integration process. Until now, studies on European integration have often focussed on the search for peaceful relations among the European nations, particularly between Germany and France, or examined it as an offspring of the Cold War, moving together with the ups and downs of transatlantic relations. But these two factors alone are not enough to explain the rise of the European Community and its more recent transformation into the European Union. Giuliano Garavini focuses instead on the emergence of the Third World as an international actor, starting from its initial economic cooperation with the creation of the United Nations Conference for Trade and Development (UNCTAD) in 1964 up to the end of unity among the countries of the Global South after the second oil shock in 1979-80. Offering a new - less myopic - way to conceptualise European history more globally, the study is based on a variety of international archives (government archives in Europe, the US, Algeria, Venezuela; international organizations such as the EC, UNCTAD, and the World Bank; political and social organizations such as the Socialist International, labour archives and the papers of oil companies) and traces the reactions and the initiatives of the countries of the European Community, but also of the European political parties and public opinion, to the rise and fall of the Third World on the international stage.

*Building Trust in the International Monetary System* - Giovanni Battista Pittaluga 2021-07-15

This book presents the evolution of the international monetary system from the gold standard to the monetary system in force today. It adopts a political economy approach, emphasizing the economic and political conditions under which an international monetary system can come into existence and be maintained over time. This approach highlights how the gradual transition in the international context from commodity money to fiat money has been led by the need for greater elasticity of money supply and smooth adjustments. This transition, however, raises the issue of how to guarantee, over time, the value of a money devoid of intrinsic value. By presenting a historical evolution, the book explains how the existence of an international monetary system based on money without intrinsic value can only occur when a particular balance of power exists at the international level that allows for the production of trust in a fiat money. The book is a must-read for scholars, researchers, and students in the fields of economic history and international monetary economics, interested in better understanding the evolution of the international monetary system.

**Catalogo dei libri in commercio** - 1999

*Partisan Wedding* Renata Vigano 1999

World War II stories on Italian women in the Resistance as heroines and traitors, and the way they exploited their femininity. In Red Flag, a woman hides guns by covering them with a soiled sanitary napkin.

*Parliamo Italiano* Suzanne Branciforte 2001-11-12

The Second Edition of Parliamo italiano! instills five core language skills by pairing cultural themes with essential grammar points. Students use culture—the geography, traditions, and history of Italy—to understand and master the language. The 60-minute Parliamo italiano! video features stunning, on-location footage of various cities and regions throughout Italy according to a story line corresponding to each unit's theme and geographic focus.

*Aesthetics and Economics* - Gianfranco Mossetto 2013-03-14

Aesthetics and Economics is a pioneering effort at treating aesthetics from the point of view of economic theory, and addresses the contradictions which have arisen from economists' work in this field over the years. Starting from an historical review of the treatment of aesthetics in economic thought, Aesthetics and Economics goes through the integration of a number of recent advances in economic thinking with the main topics of aesthetics, from creativity to interpretation. The subject is systematically treated on the grounds of a restatement of the optimization analysis on non-consequentialist bases, starting from the Kantian definition of aesthetic judgement up to its contemporary developments. A specific information asymmetry characterizing the agents' behaviours arises from the aesthetic qualification of consumption, production and investment processes, thus affecting the usual equilibrium and optimization conditions, resulting in new institutional interventions in the market. 'Certification' of the aesthetic nature of goods and stocks is needed and gives place to original market strategies and optimization problems.

**On Being and Essence** - Aquinas Saint Thomas 2021-09-09

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly

other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

**Introductory Statistics** - Sheldon M. Ross 2010-01-19

Introductory Statistics, Third Edition, presents statistical concepts and techniques in a manner that will teach students not only how and when to utilize the statistical procedures developed, but also to understand why these procedures should be used. This book offers a unique historical perspective, profiling prominent statisticians and historical events in order to motivate learning. To help guide students towards independent learning, exercises and examples using real issues and real data (e.g., stock price models, health issues, gender issues, sports, scientific fraud) are provided. The chapters end with detailed reviews of important concepts and formulas, key terms, and definitions that are useful study tools. Data sets from text and exercise material are available for download in the text website. This text is designed for introductory non-calculus based statistics courses that are offered by mathematics and/or statistics departments to undergraduate students taking a semester course in basic Statistics or a year course in Probability and Statistics. Unique historical perspective profiling prominent statisticians and historical events to motivate learning by providing interest and context Use of exercises and examples helps guide the student towards independent learning using real issues and real data, e.g. stock price models, health issues, gender issues, sports, scientific fraud.

Summary/Key Terms- chapters end with detailed reviews of important concepts and formulas, key terms and definitions which are useful to students as study tools

**English Medium Instruction** - Ernesto Macaro, 2018-02-19

Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Guangwei Hu, National Institute of Education, Singapore Additional online resources are available at [www.oup.com/elt/teacher/emi](http://www.oup.com/elt/teacher/emi) Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university. Oxford Applied Linguistics Series Advisers: Anne Burns and Diane Larsen-Freeman

**History of Italian Architecture, 1944-1965** - Edoardo Tafuri 1991-04-24

Traces the development of Italian postwar architecture, and shows examples of apartment buildings, homes, office buildings, and government buildings

**The HyperDoc Handbook** - Lisa Highfill 2016-06-01

The HyperDoc Handbook is a practical reference guide for all K-12 educators looking to transform their teaching into blended learning environments. This book strikes a perfect balance between pedagogy and how-to tips, while also providing several lesson plans to get you going using HyperDocs.

**101 Management Models** - Marijn Mulders 2019-11-08

Management models: many students will come across them in their studies, yet it is only when actually working with them that the function and benefit of management models are revealed. 101 Management Models gives a comprehensive overview of traditional models as well as

innovations in management models. To allow quick access to the models, several indexes are provided, arranged by objective, discipline and author. All models are discussed in a transparent format: the fundamentals of the management model; its application; the result; the pitfalls. This intuitive and accessible textbook will be useful for all students of management - particularly those coming at the topic from another background such as economics or engineering and is supported by a companion website:

**I diritti della scuola** - 1939

**English-Only Europe?** Robert Phillipson 2004-04-28

English-Only Europe? explores the role of languages in the process of European integration. Languages are central to the development of an integrated Europe. The way in which the European Union deals with multilingualism has serious implications for both individual member countries and international relations. In this book, Robert Phillipson considers whether the contemporary expansion of English represents a serious threat to other European languages. After exploring the implications of current policies, Phillipson argues the case for more active language policies to safeguard a multilingual Europe. Drawing on examples of countries with explicit language policies such as Canada and South Africa, the book sets out Phillipson's vision of an inclusive language policy for Europe, and describes how it can be attained.

**Education and Intercultural Identity** - Zygmunt Bauman 2021-03-11

Education and Intercultural Identity offers a dialogue between influential authors Zygmunt Bauman and Agostino Portera that reflects on and discusses contemporary events and issues relating to the crisis of global normativity, education and intercultural identity. Centered around a previously unpublished dialogue between Bauman and Portera, the book contains an extended introduction by Riccardo Mazzeo that traces key themes in the dialogue and highlights the importance of education in our globalized world. The book highlights that intercultural and multicultural education is the best developed model to meet modern day challenges including religious pluralism, pollution, and conflict. It also contains timely material relating to significant issues affecting society today; including the refugee crisis, rising authoritarian nationalism, and the risks and challenges of globalisation and sustainability. This book will be of great interest for academics, scholars and students in the fields of intercultural education, sociology and the sociology of education.

**The Modern Firm** - John Roberts 2007-09-06

Business firms around the world are experimenting with new organizational designs, changing their formal architectures, their routines and processes, and their corporate cultures as they seek to improve their current performance and their growth prospects. In the process they are changing the scope of their business operations, redrawing their organization charts, redefining the allocation of decision-making authority and responsibility, revamping the mechanisms for motivating and rewarding people, reconsidering which activities to conduct in-house and which to out-source, redesigning their information systems, and seeking to alter the shared beliefs, values and norms that their people hold. In this book, John Roberts argues that there are predictable, necessary relationships among these changes that will improve performance and growth. The organizations that are successful will establish patterns of fit among the elements of their organizational designs, their competitive strategies and the external environment in which they operate and will go about this in a holistic manner. The Modern Firm develops powerful conceptual frameworks for analyzing the interrelations between organizational design features, competitive strategy and the business environment. Written in a non-technical language, the book is nevertheless based on rigorous modeling and draws on numerous examples from eighteenth century fur trading companies to such modern firms such as BP and Nokia. Finally the book explores why these developments are happening now, pointing to the increase in global competition and changes in technology. Written by one of the world's leading economists and experts on business strategy and organization, The Modern Firm provides new insights into the changes going on in business today and will be of interest to academics, students and managers alike.

**L'Architettura** - 1958

**Body Art and Performance** Lea Vergine 2000

When The Body as Language ("Body-art" and Performance) appeared in 1974, it was immediately a huge publishing hit, reviewed by some of the most influential art historians and writers (Giulio C. Argan, Edoardo

Sanguineti, Max Kozloff, Lucy Lippard, François Pluchart, Peter Gorsen, Evelyn Weiss and many others). A direct testimony of the birth and development of one of the most controversial art trends, Lea Vergine's book avails of a series of texts by the artists themselves, whom the author had asked to contribute with a statement about the illustrations of their work. Featuring a thorough documentation of original photographs and film photograms, videotapes, happenings, actions and performances, the book analyses the evolution of this phenomenon through the works of sixty artists, including Gina Pane, Gilbert & George, Urs Lüthi and Katharina Sieverding, Rebecca Horn, Trisha Brown, Günter Brus and many others who have worked with and on the body. In an absolutely unusual publishing event, nearly thirty years after the first edition, the text--by now a classic--is republished with all the original photographic material. The volume is enhanced and brought up-to-date by an afterword by Lea Vergine, who observes the changes of Body Art throughout the nineties: Orlan, Stelarc, Ron Athey, Franko B., Yasumasa Morimura, Jana Sterbak, Matthew Barney are "virtuosos of disorder and hungry for afflictions of any and every kind, mystics--like persons who display the subjection of their bodies to cruel and invasive devices, or who revel in virtual fantasies of such self-inflicted pains--destroy themselves in order newly to find themselves. . . . They finally pay a visit to the world of the saints and victims, exploring and prolonging its seductions." *The Fear of Barbarians* Tzvetan Todorov 2010-10-15

The relationship between Western democracies and Islam, rarely entirely comfortable, has in recent years become increasingly tense. A growing immigrant population and worries about cultural and political assimilation—exacerbated by terrorist attacks in the United States, Europe, and around the world—have provoked reams of commentary from all parts of the political spectrum, a frustrating majority of it hyperbolic or even hysterical. In *The Fear of Barbarians*, the celebrated intellectual Tzvetan Todorov offers a corrective: a reasoned and often highly personal analysis of the problem, rooted in Enlightenment values yet open to the claims of cultural difference. Drawing on history, anthropology, and politics, and bringing to bear examples ranging from the murder of Theo van Gogh to the French ban on headscarves, Todorov argues that the West must overcome its fear of Islam if it is to avoid betraying the values it claims to protect. True freedom, Todorov explains, requires us to strike a delicate balance between protecting and imposing cultural values, acknowledging the primacy of the law, and yet strenuously protecting minority views that do not interfere with its aims. Adding force to Todorov's arguments is his own experience as a native of communist Bulgaria: his admiration of French civic identity—and Western freedom—is vigorous but non-nativist, an inclusive vision whose very flexibility is its core strength. The record of a penetrating mind grappling with a complicated, multifaceted problem, *The Fear of Barbarians* is a powerful, important book—a call, not to arms, but to thought.

*Mdo* - 1997

**Places of Performance** - Marvin A. Carlson 1989

**External Powers in Latin America** - Gian Luca Gardini 2021-04-21

This book examines the role of external powers in Latin America in the 21st century. Non-traditional partners have significantly increased their political and economic engagement with the continent. Five key questions arise: why has this surge taken place; when has it happened; in which regions and sectors is it mostly felt; what is the Latin American perspective; and what are the actual results? The book analyses 16 case studies: the United States, the European Union, China, Russia, Japan, Canada, India, Turkey, Iran, Israel, South Korea, Taiwan, Indonesia, the ASEAN countries, South Africa and Australia. The spectrum of existing explanations in the literature spans from neo-extractivism to South-South cooperation. This volume places them in context and proposes a more multifaceted approach, stressing a combination of systemic factors and internal dynamics both in Latin America and in the external partner countries. Geopolitics still matters and so do nation states, their interests and leaders. Ultimately, this surge in engagement has largely reproduced past patterns. Are new partners that different from the old ones?
