Yacht'n Italy Export Museum 2016. Renato "Sonny" Levi. Volume IV - Giacomo Gori 2016-09-22

Anno 2016: YTEM Yacht'n Italy Export Museum giunge al quarto episodio. In questa fase, ogni anno verrà individuata una figura di eccellenza che si sia professionalmente distinta nell'ambito della progettazione, del design, dell'innovazione, della cultura nautica che abbia dato un contributo al Made in Italy. In questa occasione YTEM, presenterà la "prima" di questa nuova fase alla 56^ edizione del Salone Nautico di Genova. La scelta del personaggio di quest'anno coincide con l'iniziativa dell'Università degli Studi di Genova di riconoscere alla figura di Renato "Sonny" Levi la Laurea Magistrale honoris causa in Yacht Design. Progettista vivente di straordinaria longevità e produttività, con alle spalle oltre sessantacinque anni di progettazione in ambito nautico, Levi ha vissuto attivamente tutto il periodo della nautica italiana, dal 1959 al presente, oggetto dello studio storico di inquadramento di YTEM. In parallelo negli spazi del padiglione B durante il 56° Salone Nautico Internazionale di Genova, la mostra "Renato 'Sonny' Levi Milestones of yacht design", organizzata dall'Università degli Studi di Genova, dalla fondazione Promostudi di La Spezia con il patrocinio del sito Altomareblu (www.altomareblu.com) e il supporto della Levi Boats e Ucina Confindustria Nautica. YTEM fin dal primo concepimento ha espresso, in una sorta di Mise en abyme, la sua volontà di essere non solo un contenitore per il design e la sua narrazione, ma esso stesso un prodotto del design Made in Italy.

Biofuels for Fuel Cells - Piet Lens 2005-09-30

The increasing demand for energy and the related environmental concerns are the main drivers for the strong interest in Biomass Fermentation towards usage in Fuel Cells. The integration of Biomass Fermentation (BF) and Fuel Cells (FC) technology creates a new and interdisciplinary research area. Due to their high efficiency Fuel Cells are therefore considered as a strategic technology for future energy supply systems. The fact that biomass is a renewable source of energy in combination with the most efficient energy conversion system (FC) makes this combination unique and advantageous. This book has a clear orientation towards making products of our waste. Biofuels for Fuel Cells comes at a time when this field is rapidly developing and there is a need for a synthesising book. The holistic and multidisciplinary description of this topic, including discussion of technological, socio-economic, system analysis and policy and regulatory aspects, make this book the definitive work for this market. Biofuels for Fuel Cells will cross-link scientists of all fields concerned with Biomass Fermentation, Fuel Upgrading and Fuel Cells at European and World level.

Directory of Multinationals - John M. Stopford 1992

This directory includes information on more than 400 companies, accounting for the bulk of the world's direct foreign investment. Only companies with over \$500 million of foreign sales are mentioned. This 4th edition highlights the trend towards increasing internationalization of companies' activities. The growing importance of major global trading blocs, including the single market within the European Community and the co-operative arrangements among SouthEast Asian and North American countries, was one of the factors fuelling the wave of merger and acquisition activity in the later 1980s and has led to expansion overseas by many of the world's largest companies.
