**Dibs** - Virginia Mae Axline 1964

Dibs in Search of Self is a book by clinical psychologist and author Virginia Axline published in 1964.[1] The book chronicles a series of play therapy sessions over a period of one year with an emotionally crippled boy (Dibs) who comes from a wealthy and highly educated family. Despite signs that he is gifted, his mother, father, and most of his teachers perceive him as having an emotional or cognitive disorder. Dibs presents abnormal social behavior by continuously isolating himself, rarely speaking, and physically lashing out at those around him. When Axline first meets Dibs's parents, they describe her as their son's last hope. The book details the interactions between Dibs and Axline and utilizes actual session transcripts for dialogue.

*The New Nuclear Disorder* Stephen J. Cimbala 2016-02-17

In the twenty-first century, the United States confronts an international system of great complexity and shifting security challenges. Among these challenges are those posed by nuclear weapons. Instead of becoming obsolete or being marginalized by the end of the Cold War and the

demise of the Soviet Union, nuclear weapons have become more important to present and future international stability and peace but the relationship is paradoxical. On one hand, the spread of nuclear weapons to additional states with unsettled grievances or hegemonic ambitions threatens to destabilize local balances of power and set off regional arms races. In addition, the possible acquisition by terrorists of nuclear weapons or fissile materials creates a threat that may be 'beyond deterrence' according to hitherto accepted concepts. On the other hand, nuclear weapons in the hands of other states can contribute to stable deterrence and help to prevent nuclear proliferation to international miscreants. Certain cases loom large in the short run that highlight this book's relevance, including the possible acquisition and deployment of nuclear weapons by Iran and the continuing tensions created by North Korea's nuclear arsenal. The Obama 'pivot' of national security and defense emphasis to Asia reflects not only the growing economic importance of that region, but also the growing number of security dilemmas in a region that is already awash in nuclear forces. The management of nuclear crises and even the possible need to terminate nuclear wars before they expand beyond a single region are among the possible challenges facing future U.S. and allied policy makers and military leaders.
