Institutionalizing Unsustainability - Hayley Stevenson 2012

Climate change is a global phenomenon that requires a global response, and yet climate-change governance depends on the ability of individual states to respond to a long-term, uncertain threat. Although states are routinely criticized for their inability to respond to such threats, the problems that arise from their attempts to respond are frequently overlooked. Focusing on the experiences of India, Spain, and Australia, Hayley Stevenson shows how these countries have struggled to integrate global norms around climate-change governance with their own deeply unsustainable domestic systems, leading to profoundly irrational ecological outcomes.

The Birth of NASA - Manfred "Dutch" von Ehrenfried 2016-03-23

This is the story of the work of the original NASA space pioneers; men and women who were suddenly organized in 1958 from the then National Advisory Committee on Aeronautics (NACA) into the Space Task Group. A relatively small group, they developed the initial mission concept plans and procedures for the U. S. space program. Then they boldly built hardware and facilities to accomplish those missions. The group existed only three years before they were transferred to the Manned Spacecraft Center in Houston, Texas, in 1962, but their organization left a large mark on what would follow. Von Ehrenfried's personal experience with the STG at Langley uniquely positions him to describe the way the group was structured and how it reacted to the new demands of a post-Sputnik era. He artfully analyzes how the growing space program was managed and what techniques enabled it to develop so quickly from an operations perspective. The result is a fascinating window into history, amply backed up by first person documentation and interviews.

This book examines how international order at sea is challenged, changed and maintained. The book surveys challenges to the international order at sea in the Asia-Pacific, the Indian Ocean Region, the Atlantic Ocean and the Arctic Ocean. It explores the interaction between and cooperation among leading, emerging and smaller naval powers, both naval and coastguard responses, required for the maintenance of good order at sea. Six broad and interlinked issues are identified that will influence the future international order at sea: the balance between the maritime and the continental domains; the balance between great power rivalry and cooperation; the contest between

access and denial; the operational balance between preparing; building and training for warfighting as opposed to operations other than war; how to manage 'disorder' security challenges that very often transcends territorial waters and national boundaries, and finally, the balance between safeguarding national interests and contributing to collective efforts preserving the international order at sea.

Informing Social Security's Process for Financial Capability Determination - National Academies of Sciences, Engineering, and Medicine 2016-05-20

The U.S. Social Security Administration (SSA) provides benefits to disabled adults and children, offering vital financial support to more than 19 million disabled Americans. Of that group, approximately 5.5 million have been deemed "by virtue of youth or mental or physical impairment - incapable of managing or directing the management of their benefits. Hence, a representative payee has been appointed to receive and disburse SSA payments for these beneficiaries to ensure that their basic needs for shelter, food, and clothing are met. Periodically, however, concerns have been expressed about the accuracy of the process by which SSA determines whether beneficiaries are capable of managing their benefits, with some evidence suggesting that underdetection of incapable recipients may be a particular problem. The importance of creating as accurate a process as possible for incapability determinations is underscored by the consequences of incorrectly identifying recipients either as incapable when they can manage their benefits or as capable when they cannot. Failure to identify beneficiaries who are incapable of managing their funds means abandoning a vulnerable population to potential homelessness, hunger, and disease. Informing Social Security's Process for Financial Capability Determination considers capability determination processes used by other similar benefit programs, abilities required to manage, and direct the management of, benefits, and effective methods and measures for assessing capability. This report evaluates SSA's capability determination process for adult beneficiaries and provides recommendations for improving the accuracy and efficiency of the agency's policy and procedures for making these determinations.
