

**Simplifying Retail** - Ritesh Mohan 2020-10-19  
Retail apocalypse or Retail renaissance Let's first of all understand that retail is not dying but bad retail is certainly dying. Brands which refuse to adapt themselves to changing consumer's buying behavior would vanish. The book cover real life case studies and examples to explain the retail concepts for the young retail managers and retail start-up owners, retailpreneurs & senior leaderships in an easy to understand style. The book is a must read for management undergraduates, retail front liners and mid managers who strive for self-learning and self-growth and development. The aim of the book is to de-mystify the complexities of existing retail and simplify it as it was earlier meant to be in the first place. Hence the title SIMPLIFYING RETAIL. Wishing all the readers a success in their retail journey

*The Longing of the Dervish* Hammūr Ziyādah 2016  
At the close of the nineteenth century, freed slave Bakhit is let out of prison with the overthrow of the Mahdist state in Sudan. On the

brink of death, the memory of his beloved Theodora is all that has sustained him through seven years of grim incarceration-that and his vow to avenge her killing. Set against a backdrop of war, religious fervor, and the monumental social and political upheavals of the time, *The Longing of the Dervish* is a love story in the most unlikely of circumstances. Lyrical and evocative, Hammour Ziada's masterfully crafted novel is about sorrow, hope, and the cruelty of fate.

**Spices and Tourism** - Lee Jolliffe 2014-06-23  
This is the first book to explore the relationship between tourism and spices. It examines the various layers of connection between spices and tourism in the context of destinations, attractions and cuisines. This volume will be useful for researchers and students in cultural tourism, culinary tourism, anthropology of food and food history.

**Pharmacy Practice Research Case Studies** - Zaheer-Ud-Din Babar 2021-02-08  
Pharmacy Practice Research Case Studies provides examples and details regarding how pharmacy practice research has transformed over the past decade and how this is impacting overall health. This book presents several methodologies and techniques used in current pharmacy practice. According to the United Nations Sustainable Development Goals, countries around the world are aiming to achieve Universal Health Coverage. In this context, pharmacists are a vital part of the healthcare teams and the book portrays the research methods used in conducting pharmacy practice and medicines use research. The professional role of pharmacists has evolved tremendously over the past few decades across the globe and the pace of change has been interestingly phenomenal in varying aspects. The book provides a great resource for pharmacists, pharmaceutical scientists, policymakers, and researchers to understand the dimensions of practice, education, research, and policy concerning pharmacy, and it provides the synthesis of the development so far, pointing to the needs and demands of the future. Provides updates on current practices and research methodologies used in pharmacy and their evolution over the last decade Offers insight into research that can be applied to global pharmacy

practice Uses case studies to demonstrate how sustainable pharmacy practice can be in other settings and other countries

*Twelve Years a Slave* Solomon Northup  
2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

**Everyday Youth Cultures in the Gulf Peninsula** - Emanuela Buscemi 2020-11-29

Focusing on the struggles of youth in the Arabian Gulf to find their place in their encounters with modernity, *Everyday Youth Cultures in the Gulf Peninsula* explores how global forces are reshaping everyday cultural experiences in authoritarian societies. A deeper understanding of Gulf youth emerges from reading about the everyday lives and struggles, opportunities, and contributions of youth who, in the process of developing their personal identities, are also incrementally transforming their societies and cultures. Based on ethnographic fieldwork in Kuwait, Oman, Saudi Arabia, the UAE, and Qatar, the chapters bring fresh insight into Gulf youth microcultures from the ground and invite dialogue by engaging young local and foreign academics in the discussion. In light of the general difficulties of accessing Gulf societies, the book's nuanced, richly detailed depictions of everyday life can be of interest to academic research in Middle East studies, youth sociology, political science and anthropology, as well as to business and governmental decision-making.

*Veterinary Microbiology & Parasitology* - Robert W. Li 2021-09-08

Numerous pathogens affect animal health and wellbeing and production efficiency. These pathogens also have a considerable impact on social economics, food safety and security, and human health. Infectious diseases that originate from both domesticated animals and wildlife

represent one of the greatest threats to human health. Recent studies show that domesticated species harbor approximately 84 times more zoonotic viruses than wild species. Eight of the top 10 mammalian species with the highest number of zoonotic viruses are domestic, such as pigs, cattle, and horses. Many animal parasites are also zoonotic, constituting an additional burden on human health. Furthermore, the rapid emergence and spread of drug-resistant pathogen strains pose new threats to animal and human health. Climate changes will undoubtedly alter the interactions between animals and between animals and humans, which will have a huge impact on the transmission rate of existing pathogens and the emergence of new pathogens or the reemergence of old pathogens. In this special collection, interactions of all major pathogen types, including viruses, bacteria, mites and flies, protozoans, and helminths, and their hosts, such as wild and companion animals and livestock species, are discussed. Further, anthelmintic activities of natural products are evaluated. The relevance and utility of cutting-edge tools, such as immunology, genomics and genetics, microbiome studies and metabolomics, and molecular epidemiology, in dissecting host-pathogen interactions are also discussed. This special collection provides a broad knowledge base that encourages dialogue across a wide distribution of the research community in veterinary microbiology and parasitology.

**Intelligent Systems Technologies and Applications 2016** - Juan Manuel Corchado Rodriguez 2016-09-19

This book constitutes the thoroughly refereed proceedings of the second International Symposium on Intelligent Systems Technologies and Applications (ISTA'16), held on September 21-24, 2016 in Jaipur, India. The 80 revised papers presented were carefully reviewed and selected from 210 initial submissions and are organized in topical sections on image processing and artificial vision, computer networks and distributed systems, intelligent tools and techniques and applications using intelligent techniques.

The Evolving Arab City - Yasser Elsheshtawy  
2008-05-27

Today cities of the Arab world are subject to many of the same problems as other world cities, yet too often they are ignored in studies of urbanisation. This collection reveals the contrasts and similarities between older, traditional Arab cities and the newer oil-stimulated cities of the Gulf in their search for development and a place in the world order. The eight cities which form the core of the book - Rabat, Amman, Beirut, Kuwait, Manama, Doha, Abu Dhabi and Riyadh - provide a unique insight into today's Middle Eastern city. Winner of The International Planning History Society (IPHS) Book Prize.

**Biocomposites and Hybrid Biomaterials of Calcium Orthophosphates with Polymers** - Sergey V. Dorozhkin 2018-09-29

This title gives an overview of composites and biocomposites. It discusses the history of CaPO<sub>4</sub>/polymer biocomposites and hybrid biomaterials, as well as analyzing the latest developments in the field. It also covers bioactivity and biodegradation of CaPO<sub>4</sub>-based biomaterials.

**Coronavirus Therapeutics - Volume I** - Alexzander A. A. Asea 2022-02-08

The book Coronavirus Therapeutics Volume I provides the most comprehensive review on contemporary knowledge on the origin and structural biology and molecular aspects of Coronaviruses. This also describes the etiology and pathogeny and therapeutic targets including vaccine drug candidates against Coronaviruses in the light of current scientific knowledge.

Using an integrative approach to the understanding of Coronaviruses structure, function and immunobiology, the contributors provide a synopsis of novel mechanisms by which Coronaviruses can be treated. Key basic and clinical research laboratories from major universities, academic medical hospitals, biotechnology and pharmaceutical laboratories around the world have contributed articles that review present research activity on the role of heat shock proteins in human diseases and importantly project the field into the future. The book is a must read for graduate students, medical students, basic science researchers and postdoctoral scholars in the fields of Cancer Biology, Oncology, Cardiovascular Diseases, Microbiology, Inflammation, Translational Medicine, Clinical Research, Biotechnology, Cell & Molecular Medicine, Pharmaceutical Scientists and Researchers involved in Drug Discovery.

*Buildings for the Performing Arts* Appleton  
2012-05-31

This Design and Development Guide is an essential book for those who are involved in the initiation, planning, design and building of facilities for the various performing arts, from local to metropolitan locations. It includes the stages in the development, decisions to be taken, information requirements, feasibility and advice necessary in the design and development of a new or adapted building. Part one of this guide provides the background information about the organisation of the performing arts, the prevailing issues, the client and various building types. In the second part, the author deals with the components of design and development, identifying the roles of the client, advisors and consultants, the stages to be achieved, including client's proposal feasibility, the process of briefing, design and building and eventually hand-over and opening night, with a consideration of the building use. Studies

include the assessment of demand, site requirements, initial brief, building design and financial viability. Information requirements, as design standards, for the auditorium and platform/stage, and the support facilities, are included. Separate studies focus on the adaptation of existing buildings and provision for children and young persons. THE CONTENT COVERS A WIDE RANGE OF PERFORMING ARTS (CLASSICAL MUSIC, POP/ROCK, JAZZ, MUSICALS, DANCE, DRAMA) AND PROVIDES INFORMATION ON EACH AS AN ART FORM AND NECESSITIES TO HOUSE PERFORMANCES.

**Visitor Experience Design** - Noel Scott  
2017-08-18

Most discussion of visitor experiences uses a behavioural or managerial approach where the way the visitor thinks is ignored - it's a black box. Visitor Experience Design is the first book of its kind to examine best practice in creating and delivering exciting and memorable travel and visitation experiences from a cognitive psychological perspective - it opens the black box. The chapters draw on recent findings from cognitive psychology, cognitive science and neuroscience to provide a basis for a better understanding of the antecedents of a memorable experience. Tourism, hospitality and event managers seek to provide WOW experiences to their visitors through better design and management. This book encourages the discussion of different facets of experience design such as emotions, attentions, sensations, learning, the process of co-creation and experiential stimuli design. It will be of interest to tourism researchers and postgraduate students studying tourism management, marketing and product design.

*Controlling Radiated Emissions by Design*  
Michel Mardiguian 2014-05-28

The 3rd edition of *Controlling Radiated Emissions by Design* has been updated to reflect the latest changes in the field. New to this edition is material on aspects of technical advance, specifically long term energy efficiency, energy saving, RF pollution control, etc. This book retains the step-by-step approach for incorporating EMC into every new design, from the ground up. It describes the selection of quieter IC technologies, their implementation

into a noise-free printed circuit layout, and the gathering of all these into low radiation packaging, including I/O filtering, connectors and cables considerations. All guidelines are supported by thorough and comprehensive calculated examples. Design engineers, EMC specialists and technicians will benefit from learning about the development of more efficient and economical control of emissions.

**Cities' Identity Through Architecture and Arts** - Yasser Mahgoub 2020-11-28

This book covers a broad range of topics relating to architecture and urban design, such as the conservation of cities' culture and identity through design and planning processes, various ideologies and approaches to achieving more sustainable cities while retaining their identities, and strategies to help cities advertise themselves on the global market. Every city has its own unique identity, which is revealed through its physical and visual form. It is seen through the eyes of its inhabitants and visitors, and is where their collective memories are shaped. In turn, these factors affect tourism, education, culture & economic prosperity, in addition to other aspects, making a city's identity one of its main assets. Cities' identities are constructed and developed over time and are constantly evolving physically, culturally and sociologically. This book explains how architecture and the arts can embody the historical, cultural and economic characteristics of the city. It also demonstrates how cities' memories play a vital role in preserving their physical and nonphysical heritage. Furthermore, it examines the transformation of cities and urban cultures, and investigates the various new approaches developed in contemporary arts and architecture. Given its scope, the book is a valuable resource for a variety of readers, including students, educators, researchers and practitioners in the fields of city planning, urban design, architecture and the arts.

**Proceedings of the 2nd International and Interdisciplinary Conference on Image and Imagination** - Enrico Cicalò 2020-03-17

This book gathers peer-reviewed papers presented at the 1st International and Interdisciplinary Conference on Image and Imagination (IMG 2019), held in Alghero, Italy, in July 2019. Highlighting interdisciplinary and

multi-disciplinary research concerning graphics science and education, the papers address theoretical research as well as applications, including education, in several fields of science, technology and art. Mainly focusing on graphics for communication, visualization, description and storytelling, and for learning and thought construction, the book provides architects, engineers, computer scientists, and designers with the latest advances in the field, particularly in the context of science, arts and education.

### **Data-Driven Mining, Learning and Analytics for Secured Smart Cities** - Chinmay Chakraborty 2021-04-28

This book provides information on data-driven infrastructure design, analytical approaches, and technological solutions with case studies for smart cities. This book aims to attract works on multidisciplinary research spanning across the computer science and engineering, environmental studies, services, urban planning and development, social sciences and industrial engineering on technologies, case studies, novel approaches, and visionary ideas related to data-driven innovative solutions and big data-

powered applications to cope with the real world challenges for building smart cities.

### **On the Sidelines** - Guy Harrison 2021-08

When sports fans turn on the television or radio today, they undoubtedly find more women on the air than ever before. Nevertheless, women sportscasters are still subjected to gendered and racialized mistreatment in the workplace and online and are largely confined to anchor and sideline reporter positions in coverage of high-profile men's sports. In *On the Sidelines* Guy Harrison weaves in-depth interviews with women sportscasters, focus groups with sports fans, and a collection of media products to argue that gendered neoliberalism—a cluster of exclusionary twenty-first-century feminisms—maintains this status quo. Spinning a cohesive narrative, Harrison shows how sportscasting's dependence on gendered neoliberalism broadly places the onus on women for their own success despite systemic sexism and racism. As a result, women in the industry are left to their own devices to navigate double standards, bias in hiring and development for certain on-air positions, harassment, and emotional labor. Through the lens of gendered neoliberalism, *On the Sidelines* examines each of these challenges and analyzes how they have been reshaped and maintained to construct a narrow portrait of the ideal neoliberal female sportscaster. Consequently, these challenges are taken for granted as “natural,” sustaining women's marginalization in the sportscasting industry.

### **Lighting Design Basics** - Mark Karlen 2011-01-14

Lighting is a basic, yet difficult-to-master, element of interior design, and *Lighting Design Basics* provides the information you need in a concise, highly visual format. Two leading designers, both with decades of experience, offer straightforward coverage of concepts and techniques, and present realistic goals you can use as guides to creating simple, typical lighting designs and when collaborating with professional designers on more complex projects. Design scenarios for more than twenty different spaces illustrate real-world case studies for illuminating residential and commercial spaces, from kitchens to doctors' offices. Each scenario includes an in-depth

International Conference on Innovative Computing and Communications - Ashish Khanna 2021-08-29

This book includes high-quality research papers presented at the Fourth International Conference on Innovative Computing and Communication (ICICC 2021), which is held at the Shaheed Sukhdev College of Business Studies, University of Delhi, Delhi, India, on February 20-21, 2021. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications.

Theatre Buildings - Association of British Theatre Technicians 2010-06-08

The Association of British Theatre Technicians produced its first guide to the design and planning of theatres in 1972. Revised in 1986, it became the standard reference work for anyone involved in building, refurbishing, or creating a performance space. *Theatre Buildings* - a design guide is its successor. Written and illustrated by a highly experienced team of international theatre designers and practitioners, it retains the practical approach of the original while extending the scope to take account of the development of new technologies, new forms of presentation, changing expectations, and the economic and social pressures which require every part of the theatre to be as productive as possible. The book takes the reader through the whole process of planning and designing a theatre. It looks in detail at each area of the

building: front of house, auditorium, backstage, and administrative offices. It gives specific guidance on sightlines, acoustics, stage engineering, lighting, sound and video, auditorium and stage formats. Aspects such as catering, conference and education use are also covered. The information is supplemented by twenty-eight case studies, selected to provide examples which range in size, style and format and to cover new buildings, renovations, conversions, temporary and found space. The studies include Den Norsk, Oslo; The Guthrie Theatre, Minneapolis; The Liceu, Barcelona; Les Bouffes du Nord, Paris; The RSC's Courtyard Theatre in Stratford on Avon; and the MTC Theatre in Melbourne. All have plans and sections drawn to 1:500 scale. The book contains around 100 high quality full colour images as well as over 60 specially drawn charts and diagrams explaining formats, relationships and technical details.

MEED. - 1990

Planning Middle Eastern Cities - Yasser Elsheshtawy 2004-08-02

Middle Eastern cities cannot be lumped together as a single group. Rather they make up the urban kaleidoscope of the title, as the diversity of the six cities included here shows. They range from cities rich in tradition (Cairo, Tunis, and Baghdad), to neglected cities (Algiers and Sana'a), to newly emerging 'oil-rich' Gulf cities (Dubai). The authors are all young Arab scholars and architects local to the cities they describe, providing an authentic voice with an understanding no outsider could achieve. These contributors move away from an exclusively 'Islamic' reading of Arab cities - which they regard as outdated and counterproductive. Instead, they explore issues of identity and globalization in the context of the struggles and solutions offered by each city from the late nineteenth century to the present day. Their focus is on how the built environment has changed over time and under different influences.

The Persian Gulf in Modern Times. Potter 2014-12-18

This book explores the historiography, ports, and peoples of the Persian Gulf over the past two centuries, offering a more inclusive history of

the region than previously available. Restoring the history of minority communities which until now have been silenced, the book provides a corrective to the 'official story' put forward by modern states.

**Wastewater Treatment, Valorization and Reuse** - Salah Jellali 2021-09-02

This book deals with the latest developments regarding urban and industrial wastewaters' adapted treatment with various technologies. It focuses, through valuable publications, on the

shifting of the wastewater management paradigm from "treatment and disposal" to "the 4Rs principle: Reduce, Recycle, Reuse, and Recover". The adapted wastewater treatment step will allow (i) the disposal of supplementary water amounts that could be safely reused in order to tackle the water-scarcity problem, and (ii) the preservation of the environment against pollution. Finally, this book will contribute to the achievement of the United Nations Sustainable Development Goals and other international related initiatives.
