International Student Security - Simon Marginson 2010-05-10

More than three million students globally are on the move each year, crossing borders for their tertiary education. Many travel from Asia and Africa to English speaking countries, led by the United States, including the UK, Australia and New Zealand where students pay tuition fees at commercial rates and prop up an education export sector that has become lucrative for the provider nations. But the 'no frills' commercial form of tertiary education, designed to minimise costs and maximise revenues, leaves many international students inadequately protected and less than satisfied. International Student Security draws on a close study of international students in Australia, and exposes opportunity, difficulty, danger and courage on a massive scale in the global student market. It works through many unresolved issues confronting students and their families, including personal safety, language proficiency, finances, sub-standard housing, loneliness and racism.

Targets [3 Volumes] - James J. F. Forest
2006-06-30

America is a target; the homeland is under threat. While Americans have been targets of terrorist attacks for quite some time, September 11, 2001, awoke the nation to the reality that we are vulnerable in our homes, our places of work and worship, and our means of public transportation. And yet, we must continue to function as best we can as the world's most vibrant economic and political community. The current threat environment requires greater engagement with the public, as the necessary eyes and ears of the nation's homeland security infrastructure. However, to be effective, the public must be equipped with the knowledge of where and why specific locations and activities may be a terrorist target, what is being done to protect those targets, and how they can help. This three-volume set answers that need. The chapters of each volume of Homeland Security revolve around a core of central questions. Are

we safer today than we were pre-9/11? What steps have been taken in all these areas to protect ourselves? What are the threats we face, and what new threats have developed since 9/11? Are we staying one step ahead of those who wish to do us harm? In 2002, more than 400 million people, 122 million cars, 11 million trucks, 2.4 million freight cars, and 8 million containers entered the United States. Nearly 60,000 vessels entered the United States at its 301 ports of entry. Clearly the amount of activity this represents will require a long-term commitment to innovation, organizational learning, and public vigilance to complement an already overstretched network of government agencies and security professionals. Volume 1, Borders and Points of Entry, addresses the question of how and where harmful people or material can enter the country, and how a combination of local, state, and federal agencies work with the private sector to ensure our security. Volume 2, Public Spaces and Social

Handbook of Research on Advising and Developing the Pre-Health Professional Student - Schwartz, Lisa S. 2022-04-29

Despite significant demand for healthcare professionals in the workforce, admission to health professional graduate programs is highly

competitive with less than half of all medical school applicants gaining admission annually. The application process is nuanced, complex, and costly, which can often be a significant barrier to otherwise highly qualified students, particularly those from backgrounds underrepresented in the healthcare workforce. Further understanding of the best practices in navigating the application processes, academia, and professional development is crucial for those advising pre-health students. The Handbook of Research on Advising and Developing the Pre-Health Professional Student considers current practices and research regarding academic and extracurricular preparation of undergraduate students who wish to enter health professions and offers new pre-health professional advisors as well as more seasoned advisors and other administrators a resource to assist them in their professional journey. Chinese International Students' Stressors and Coping Strategies in the United States -

Kun Yan 2017-01-11

This book explores how Chinese students abroad may suffer stress, and how they conceptualize and adapt to stress in the American higher education environment. To do so, it adopts a mixed methods design: the sequential explanatory design, which is characterized by the collection and analysis of quantitative data followed by the collection and analysis of qualitative data. To date, no empirical research has focused solely upon understanding the stress and coping processes of Chinese students in the United States. This book addresses that gap, enriching the body of literature on international students' adaptation process in foreign countries.

Succeeding as an International Student in the United States and Canada - Charles Lipson 2010-02-15

Each year, 700,000 students from around the world come to the United States and Canada to study. For many, the experience is as challenging as it is exciting. Far from home, they

must adapt to a new culture, new university system, and in many cases, a new language. The process can be overwhelming, but as Charles Lipson's *Succeeding as an International Student in the United States and Canada* assures us, it doesn't have to be. *Succeeding* is designed to help students navigate the myriad issues they will encounter—from picking a program to landing a campus job. Based on Lipson's work with international students as well as extensive interviews with faculty and advisers, *Succeeding* includes practical suggestions for learning English, participating in class, and meeting with instructors. In addition it explains the rules of academic honesty as they are understood in U.S. and Canadian universities. Life beyond the classroom is also covered, with handy sections on living on or off campus, obtaining a driver's license, setting up a bank account, and more. The comprehensive glossary addresses both academic terms and phrases heard while shopping or visiting a doctor. There is even a

Impacts of COVID-19 on International Students and the Future of Student Mobility

- Krishna Bista 2021-09-29

This volume uses case studies and students' lived experiences to document the impacts of coronavirus (COVID-19) on international students and explore future challenges and opportunities for student mobility within higher education. Responding to the growing need for new insights and perspectives to improve higher education policy and practice in the era of COVID-19, this text analyses the changing roles and responsibilities of institutions and international education leaders post-2020. Initial chapters highlight key issues for students that

have arisen as a result of the global health crisis such as learning, well-being, and the changed emotional, legal, and financial implications of study abroad. Subsequent chapters confront potential longer-term implications of students' experiences during COVID-19, and provide critical reflection on internationalization and the opportunities that COVID-19 has presented for tertiary education systems around the world to learn from one another. This timely volume will benefit researchers, academics, and educators with an interest in online teaching and e-learning, curriculum design, and more specifically those involved with international and comparative education. Those involved with educational policy and practice, specifically related to pandemic education, will also benefit from this volume.

Korean Digital Diaspora - Hojeong Lee
2020-12-10

Through a critical examination of the Korean diaspora in transnational contexts as a case study, *Korean Digital Diaspora: Transnational Social Movements and Diaspora Identity* unmasks the process of how people of the diaspora have built social interactions and communication with others online, how they

have orchestrated social movements, and finally, how they have narrated and reshaped their diaspora identities in their everyday lives. Utilizing an ethnographical approach, including in-depth interviews, participant observation, and a field study in New York City and Philadelphia, Hojeong Lee delineates how digital media technology has expanded into a new form of diaspora, digital diaspora, within the Korean diaspora community, and how it has mobilized the social movements of Korean diaspora members. Accordingly, Korean diaspora members have begun to imagine their community as a transnational global diaspora. Korean Digital Diaspora concludes with an analysis of how the changed attitudes of diaspora members have also influenced how they define themselves and how they are reshaping their diaspora identities. This multi-site, three-year study reveals the nexus of media, individuals, and society, highlighting the transnational social movements of diaspora

members.

Korean International Students and the Making of Racialized Transnational Elites - Sung-Choon Park 2020-01-31

By examining privileged and highly skilled Asian migrants, such as international students who acquire legal permanent residency in the United States, this book registers and traces these transnational figures as racialized transnational elites and illuminates the intersectionality and reconfiguration of race, class, ethnicity, and nationality. Using in-depth interviews with Korean international students in New York City and Koreans in South Korea as a case study, this book argues that racialized transnational elites are embedded in racial and ethnic dynamics in the United States as well as in class and nationalist conflicts with non-migrant co-ethnics

in the sending country. Sung-Choon Park further argues that strategic responses to the local, social dynamics shape transnational practices such as diaspora-building, transfer of knowledge, conversion of cultural capital, and cross-border communication about race, causing heterogeneous social consequences in both societies.
