Data for the People Andreas Weigend 2017-01-31

A long-time chief data scientist at Amazon shows how open data can make everyone, not just corporations, richer Every time we Google something, Facebook someone, Uber somewhere, or even just turn on a light, we create data that businesses collect and use to

make decisions about us. In many ways this has improved our lives, yet, we as individuals do not benefit from this wealth of data as much as we could. Moreover, whether it is a bank evaluating our credit worthiness, an insurance company determining our risk level, or a potential employer deciding whether we get a job,

it is likely that this data will be used against us rather than for us. In *Data for the People*, Andreas Weigend draws on his years as a consultant for commerce, education, healthcare, travel and finance companies to outline how Big Data can work better for all of us. As of today, how much we benefit from Big Data depends on how closely the interests of big companies align with our own. Too often, outdated standards of control and privacy force us into unfair contracts with data companies, but it doesn't have to be this way. Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us. Only then can we the people get back more from Big Data than we give it. Big Data is here to stay. Now is the time to find out how we can be empowered by it.

When Right Makes Might - Stacie E. Goddard 2018-12-15
Why do great powers accommodate the rise of some challengers but contain and confront others, even at the risk of war? *When Right Makes Might* proposes that the ways in which a rising power legitimizes its expansionist aims significantly shapes great power responses. Stacie E. Goddard theorizes that when faced with a new challenger, great powers will attempt to divine the challenger's

intentions: does it pose a revolutionary threat to the system or can it be incorporated into the existing international order? Goddard departs from conventional theories of international relations by arguing that great powers come to understand a contender's intentions not only through objective capabilities or costly signals but by observing how a rising power justifies its behavior to its audience. To understand the dynamics of rising powers, then, we must take seriously the role of legitimacy in international relations. A rising power's ability to expand depends as much on its claims to right as it does on its growing might. As a result, *When Right Makes Might* poses significant questions for academics and policymakers alike. Underpinning her argument on the oft-ignored significance of public self-presentation, Goddard suggests that academics (and others) should recognize talk's critical role in the formation of grand strategy. Unlike

rationalist and realist theories that suggest rhetoric is mere window-dressing for power, *When Right Makes Might* argues that rhetoric fundamentally shapes the contours of grand strategy. Legitimacy is not marginal to international relations; it is essential to the practice of power politics, and rhetoric is central to that practice.

Three Cups of Tea - Greg Mortenson 2006-03-02
The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, Three Cups of Tea combines adventure with a celebration of the humanitarian spirit.

Friendships Don't Just Happen! highlights several areas of developing lasting friendships, teaching women how to: Evaluate their current circle of friends Recognize what types of friends they are seeking based on career, interests, location, and relationship status Create a prioritized friendship action plan Find extraordinary friends—where to look and how to approach them Take initiative to jumpstart friendships and face fears of rejection Establish “friintimacy,” trust, and happiness through conversation and activities Maintain meaningful friendships and determine which ones are worthwhile Excerpt from Friendships Don't Just Happen: There is a lie out there that real friendship just happens. When I was new to San Francisco eight years ago, I remember standing at a café window on Polk Street watching a group of women inside, huddled around a table laughing. Like the puppy dog at the pound, I looked through the glass, wishing someone

would pick me to be theirs. I had a phone full of far-flung friends' phone numbers, but I didn't yet know anyone I could just sit and laugh with in a café. It hit me how very hard the friendship process is. I'm an outgoing, socially comfortable woman with a long line of good friendships behind me. And yet I stood there feeling very lonely. And insecure. And exhausted at just the idea of how far I was from that reality. I knew I couldn't just walk in there and introduce myself to them. “Hi! You look like fun women, can I join you?” I would have been met with stares of pity. No one wants to seem desperate, even if we are. We don't have platonic pick-up lines memorized. Flirting for friends seems creepy. Asking for her phone number like we're going to call her up for a Saturday night date is just plain weird. All the batting of my eyelashes wasn't going to send the right signals. And so I turned away from the scene of laughter and walked away. No, unfortunately, friendships don't

just happen. We Value Belonging Friendships may not happen automatically, but what we crave about them sure seems to! We all want to belong—that need to be connected to others is an inherent desire. We live our entire lives trying to fit in, be known, attract acceptance, and experience intimacy. We desperately want to have others care about us. This book is about that hunger. And more pointedly, it is about listening to it and learning how to fulfill it.
