London: Business, Travel, Culture - Nicolae Sfetcu 2014-08-10

Revision 1.1 London is the most important political, financial, cultural and artistic center of the United Kingdom, and one of the most important cities of the world. In London there are many institutions and corporate headquarters of global importance; many important buildings: palaces, museums, theaters, concert halls, airports, railway stations, numerous embassies and consulates. London is a huge engine of the world economy. City is the largest financial center of London, home to banks, securities companies, insurance companies, law and accounting. A second financial district is developing, Canary Wharf. More than half of the top 100 British companies have their headquarters in central London and more than 70% in the metropolitan area of London. 31% of the world monetary transactions take place in London. Here are selling and buying more dollars than in New York, and more euros than in all other European cities. Tourism is one of the most important industries of the United Kingdom; over 350,000 people worked in tourism in 2003 only in London. With a number of universities, colleges and schools, London has a population of about 378,000 students, making it an important center of research and development.

The Murdoch Archipelago - Bruce Page 2013-09-17

Rupert Murdoch is one of the most powerful men in the world today. As chief executive of

News Corporation, he controls a global media empire which boasts some of the major players in newspapers, television, publishing and the movie business. In the English-speaking world, and increasingly in 'untapped' but potentially lucrative markets such as China, he wields an influence as political kingmaker second to none. How did he do it? How did this empire, a loose 'archipelago' of media islands large and small, come to be so successful and influential? Building on many years' research and featuring many previously undisclosed revelations, **THE MURDOCH ARCHIPELAGO** is the most definitive survey yet of Murdoch's life and times; how power flows from influence; and whether this should (or if it can) be regulated.

Understanding the Higher Education Market in Africa - Emmanuel Mogaji 2020-03-06

This book offers theoretical and practical insights into the marketing of higher education in Africa. It explores the key players, challenges and policies affecting higher education across the continent; their marketing strategies and the students' selection process. While acknowledging the vast size of the continent, this book aims to provide an understanding of the dynamics of higher education in Africa. This book recognises the private and government involvement in higher education provision and students and staff as stakeholders in the marketisation process. Strategic efforts are directed by universities to attract prospective students. This book further addresses issues

such as the responses of higher education sectors to the notion of markets and marketing; consumerism and competition in higher education in Africa; conceptions of the commodification of higher education in Africa; and the dominance of Western epistemologies and their influence in transforming higher education sectors. Students as consumers in increasingly marketised higher education sectors in Africa are also discussed. Though primarily for marketing students and academic researchers, the book's feature of blended theoretical and practical knowledge means that it will also be of interest to marketing practitioners and university managers.

Private Education In Singapore: Contemporary Issues And Challenges - Sam Choon-yin

2017-05-23

Not much has been written about the private education sector in Singapore despite the fact that the sector houses about 300 private education institutions (PEIs) and enrolls about 150,000 students. Private Education in Singapore: Contemporary Issues and Challenges is an exciting book that aims to fill a gap in the literature. In the book, the author offers an extensive discussion on (i) the key elements of the sector — types and features of the PEIs, (ii) the regulatory framework for private education, (iii) students' aspiration and the impact of the ASPIRE report on PEIs, and (iv) the provision of external degree programme through transnational partnership. The book also tackles the hotly debated discussion in relation to academic quality and standard of PEI courses. The author identifies the reasons — some of them have more characteristics of a myth — and suggests a number of ways to overcome the issues and challenges.

Slabbert - Albert Grundlingh 2021-01-25

Frederik van Zyl Slabbert was a man on a mission, whether as an academic, an opposition politician, a democratic facilitator or a businessman. Perhaps this was a product of his restless, probing intellect, or his early ambition to become a dominee in the Dutch Reformed

Church. When he famously led a delegation of leading Afrikaners to Dakar in 1987 to meet the exiled ANC, many saw it as a breakthrough, while others felt he had been taken in. And yet his reputation — for honesty, integrity, wit and courage — still towers above many of his contemporaries. Slabbert was always different. As an academic turned politician, the charismatic Slabbert brought unusual intellectual rigour to Parliament, transforming the upstart Progressive Federal Party into a force that challenged the National Party government. But disillusioned by the paralysis of formal white politics, and by the growing polarisation of South African society, he resigned in 1986 to explore democratic alternatives to the impasse into which the country had been led under apartheid. Largely side-lined during the democratic transition, he continued to pursue a broad range of initiatives aimed at building democracy, empowering black South Africans and transforming the economy. Albert Grundlingh's penetrating biographical study offers sharp insights into the thinking and motivation of this most unlikely politician. Concise but wide-ranging, Slabbert: Man on a Mission provides new perspectives on a figure who even today remains something of an enigma.

Crisis Response in Higher Education - Mats Benner 2022

This open access book explores the impact of Covid-19 on universities, and how students, staff, faculty and academic leaders have adapted to and dealt with the impact of the pandemic. Drawing on experiences from Britain, Australia and Sweden, it showcases how Covid has challenged routines and procedures in universities, and thrown them into a disarray of ever-changing events and short-term adaptations. The authors pay particular

attention to how students, staff, faculty, and leaders have coped with Covid, through a series of autobiographical portraits of their strains but also heroic efforts in the harshest of circumstances. This important book explores the exceptional ramifications of the pandemic but also how universities may contribute to a fairer and more robust society and concludes with a set of prescriptions for universities that aim to be proactive and resilient forces in society. It will be of interest to scholars interested in higher education, governance and organizational studies.

Language and Power - Andrea Mayr 2008-08-21

How language is used in institutions and how institutions generate language is a key concern of both sociolinguistics and social theory. This readable and comprehensive introduction to

language and power in institutions combines theoretical reflection with a strong analytical focus. Covering a range of institutional discourses and settings, each chapter in *Language and Power* closely examines institutional discourse practices and provides detailed steps to the critical analysis of institutional discourse both linguistic and multimodal. This book is a long overdue contribution to the analysis of the way that institutions have the power to shape our thinking and understanding of the world and to construct identities. Key Features: *This book contains fascinating examples from a variety of institutional contexts, including academia, prison, media and the military *It brings together insights from (multimodal) critical discourse analysis, social theory, media studies and corpus analysis *It is essential reading for advanced undergraduates and postgraduates doing sociolinguistics, media studies, communication and cultural studies

THE EDUCATIONAL TIMES, AND JOURNAL OF THE COLLEGE PRECEPTORS. - c.f hodgson and sons, 2, Gough Square 1880

More Bad News (Routledge Reviews) Peter Beharrell 2009-10-15

First published in 1980, *More Bad News* is the Second Volume in the research findings of the Glasgow University Media Group. It develops the analytic findings and methods of the first volume *Bad News* through a series of Case Studies of Television News Coverage, and argues that much of what passes as balanced and factual news reporting is produced from a highly partial viewpoint. Focusing on the British economy in crisis, and its thematic linkage with the Social Contract during the first four months of 1975, the book deals with three main levels of activity: the story, the language and the visuals. As the book unpacks each level of routine news coverage a picture emerges which has the

surface appearance of neutrality and balance but is in fact highly partial and restricted

The Great Abdication - Alexander Deane
2016-12-01

The middle class provides British society with its stability and strength. According to Deane's contentious thesis, our middle class has abstained from its responsibility to uphold societal values, and the enormously damaging collapse of our society's norms and standards is largely a result of that abdication. The institutions of political and social governance provide a husk of functionality and mask these problems for those that do not wish to see, or do not care. To restore Britain to something resembling a substantively functioning country, the middle classes must reinstate themselves as arbiters of morality, be unafraid to judge their fellow men, and follow through with the condemnation that necessarily follows when individuals sin against common values.

A Question of Leadership - Keith Leslie
2021-02-18

A fascinating guide to effective leadership in times of crises with a psychological underpinning. Whether planned or unexpected, change presents leaders with their toughest sustained challenges - regardless of the leader's seniority or the organisation's size. For many leaders, change brings drama - and the replaying of familiar stories. In A Question of Leadership, Keith Leslie provides a wide range of illustrative case studies derived from both research and his first-hand experience in the public and private sectors as a former partner at both Deloitte and McKinsey. Each chapter first provides an engaging narrative that presents a relatable leadership dilemma, before an analysis of what works and when (often reaching seemingly counterintuitive solutions), followed by a selection of research which supports this thesis and, finally, actionable advice for leaders who find themselves in comparable circumstances (or may do so in the future). Alongside their individual takeaways, each of these case studies are united behind an overarching thesis: the failure of many change initiatives (research shows that approx. 60-70% fail) is caused by the leader's inability to fully consider the consequences and magnitude of the

situation. Whether they consider it 'just a game', or they are 'gaming the system', they often fail to recognise the full consequences of the change initiative. Across business and society, the prevalence and impacts of such short-sighted mistakes has become more overt than ever following the onset of the ongoing pandemic. A Question of Leadership also places an emphasis upon one element of corporate leadership and change initiatives that is frequently overlooked yet more important than ever: mental health. The book provides expert advice on managing mental health (both that of the leader and their team) within stressful, high-pressure environments. This is a timely and essential guide for any business leader looking for the most effective strategies and approaches when it comes to change initiatives. Keith Leslie explores the corporate consequences of the worldwide pandemic, and analyses how leaders can adapt and improve to ensure the continued livelihood and prosperity of their organization and employees in the wake of crises.

Dying for the Truth - Paul Moorcraft
2016-11-30

The role of war correspondents is crucial to democracy and the public's discovery of the truth. Without them, the temptation to manipulate events with propaganda would be irresistible to politicians of all hues. It starts by examining how journalists have plied their trade over the years most particularly from the Crimean War onwards. Their impact on the conduct of war has been profound and the author, an experienced journalist, explains in his frank and readable manner how this influence has shaped the actions of politicians and military commanders. By the same token the media is a potentially valuable tool to those in authority and this two-way relationship is examined. Technical developments and 24 hour news have inevitably changed the nature of war reporting and their political masters ignore this at their peril and the author examines the key milestones on this road. Using his own and others' experiences in recent conflicts, be they Korea, Falklands, Balkans, Iraq or Afghanistan, the author opens the reader's eyes to an aspect of warfare that is all too often overlooked but can be crucial to the outcome. The public's attitude to the day-to-day conduct of war is

becoming ever more significant and this fascinating book examines why.

Kate - Sean Smith 2011-05-24

An eBook-only edition of the UK instant bestselling biography of Britain's newest princess Kate Middleton—from her childhood to the royal wedding. Kate is the definitive biography of Britain's newest princess. Bestselling author Sean Smith has retraced the steps of Kate's journey, from her childhood in rural Berkshire and her unhappy time as a victim of school bullies, to her transformation from a plain, gangly girl into the beauty she is today. He reveals the true story of how the romance with William blossomed at St Andrews University and, later, how they managed to survive as a couple after the relationship hit the rocks in 2007. Smith examines Kate's time spent as a royal apprentice and her evolving role as an ambassador for British fashion. The story ends in Westminster Abbey where Kate and William married, describing all the glamor and spectacle of their big day, and the event of the decade.

The Image of Christ in Modern Art Richard Harries 2016-03-03

The Image of Christ in Modern Art explores the challenges presented by the radical and rapid changes of artistic style in the 20th century to artists who wished to relate to traditional Christian imagery. In the 1930s David Jones said that he and his contemporaries were acutely conscious of 'the break', by which he meant the fragmentation and loss of a once widely shared Christian narrative and set of images. In this highly illustrated book, Richard Harries looks at some of the artists associated with the birth of modernism such as Epstein and Rouault as well as those with a highly distinctive understanding of religion such as Chagall and Stanley Spencer. He discusses the revival of confidence associated with the rebuilding of Coventry Cathedral after World War II and the

commissioning of work by artists like Henry Moore, Graham Sutherland and John Piper before looking at the very testing last quarter of the 20th century. He shows how here, and even more in our own time, fresh and important visual interpretations of Christ have been created both by well known and less well known artists. In conclusion he suggests that the modern movement in art has turned out to be a friend, not a foe of Christian art. Through a wide and beautiful range of images and insightful text, Harries explores the continuing challenge, present from the beginning of Christian art, as to how that which is visual can in some way indicate the transcendent.

The Impact of Higher Education Ranking Systems on Universities - Kevin Downing

2021-04-05

This book, written by three generations of rankings academics with considerable experience from three very different regions of the globe, lifts the lid on the real impact of higher education ranking systems (HERS) on universities and their stakeholders. It critically analyses the criteria that make up the 'Big Three' global ranking systems and, using interviews with senior administrators, academics and managers, discusses their impact on universities from four very different continents. Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS. Despite all the opinions and arguments about the legitimacy of the rankings as a construct, it seems experts agree that they are here to stay. The question, therefore, seems to be less about whether or not universities should be compared and ranked, but the manner in which this is undertaken. Delivering a fresh perspective on global rankings, this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions - South Africa, the Arab region, South East Asia, and Australia. It will appeal to any academic, student, university administrator or governing body interested in or affected by global higher education ranking systems.

The History of the University of East Anglia, Norwich - Michael Sanderson 2002-01-01

The University of East Anglia at Norwich was one of a number of new universities founded in Britain in the 1960s in response to the need to increase the provision for higher education. Remarkable for its architecture, primarily by Denys Lasdun, and for its superb Sainsbury Art Collection, its history is a telling commentary on the opportunities and problems faced by British universities over the last forty years. of the University of East Anglia Norwich is a full account of UEA's foundation, growth and distinctive character. Michael Sanderson highlights both the university's successes and failures, at the same time painting a picture of life, teaching and research on the campus. By examining the real problems faced by a leading British university, he has provided an important contribution to British educational history.

The Willits Brothers and Their Canoes -

Patrick F. Chapman 2006-05-11

For half a century Earl and Floyd Willits built some of the world's finest canoes, first near Artondale, Washington, then on Day Island, right off of Puget Sound in Tacoma. Turning out approximately twenty canoes a year, carefully logging and numbering each one, the brothers emphasized quality and design rather than volume. Willits Brothers Canoe Company earned a reputation that enabled the tiny company to compete successfully with businesses much larger, leaving a name and legacy which is still admired by canoe aficionados today. Carefully

researched and documented, this combination biography and company history tells the story of Earl and Floyd Willits and their unique canoe company. Beginning with their family's westward migration from Illinois, it follows the brothers as they set about starting the business that would become their lifelong work. Close attention is given to the Willitses' business management and construction techniques as well as their personal lives. Interviews with surviving contemporaries and family members add a personal dimension to the Willitses' story. Appendices include a detailed company logbook, instructions from the Willits brothers on various areas of canoe use and maintenance, a price list of canoes from 1928 to 1964 and a list of serial numbers and dates of manufacture. In addition, a price comparison with the Old Town Canoe Company, a listing of museums exhibiting a Willits Brothers canoe, two Willits Brothers Canoe company catalogs and various plans of Willits canoes are provided. Contemporary photographs from the Willits family collection are also included.
